Allowable Subject Matter

1. Claims 1, 4, 6-24 and 28-31 are allowed.

The following is an examiner's statement of reasons for allowance: A device for storing of at least one of a solid, a liquid or a gaseous object, the device comprising: an electrical data memory including at least one memory cell having electronic components, wherein the memory cell is assigned to the compartment and the compartment triggers an electrically readable signal and having a mechanically changeable relationship with the object; and wherein the compartment forms an integral part of the electronic components of the memory cell in the manner claimed, is not sufficiently taught or suggested in the prior art.

Moreover, the prior art indicates that this particular device is novel and has not been published or patented by other entities.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

- 2 The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Brue (US 7,158,011) and McIntosh et al. (US 5,088,056) both disclose compartments for storing a solid wherein the compartments are connected to a memory

device, but neither reference discloses the compartment forming an integral part of the electronic components of the memory cell.
